DETAILED ACTION

This action is in response to papers filed on September 9, 2006.

Claims 2, 4, 21-24 and 28-30 have been amended.

Claims 2, 4, 21-24 and 28-30 are pending.

Claims 2, 4, 21-24 and 28-30 are rejected.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

1. Claims 2, 4, 21-24 and 28-30 are rejected under 35 U.S.C. 102(e) as being anticipated by US Patent 6,285,916 Multi-stage Parcel Tracking System; Kadaba et al.; hereinafter referred to as Kadaba.
2. As to claims 2, 4, 21-24 and 28-30 Kadaba teaches
 - a. Matching user id, tracking numbers, names etc with parcels being shipped and shipping status(C. 7 I. 30-35)
3. Displaying a message to a user indicating the status of the shipped parcel(C. 7 I. 65-67 & C. 8 I. 1-2). The examiner notes that "information relating to contents" is also status information. If there parcel is in transit then the contents of the parcel are therefore in-transit as well. However, as to applicants "information relating to contents" and "image of contents" these differences are only found in the nonfunctional descriptive material and are not functionally involved in the steps recited. **The steps**

would be performed regardless of the information or images presented. Thus, this descriptive material will not distinguish the claimed invention from the prior art in terms of patentability, see in re Gulack, 703 F.2d 1381, 1385, 217 USPQ 401, 44(Fed. Cir. 1983); In re Lowry, 32 F.3d 1579, 32 USPQ 2d 1031(Fed. Cir. 1994).

- b. Allowing the user to view the information over a computer network(C. 8 I. 9-15).

Computers for displaying tracking information to the user(C. 9 I. 43-46).

Response to Arguments

4. Applicant's arguments filed September 5, 2006 have been fully considered but they are not persuasive.

5. Applicant argues that the prior art fails to teach the images of contents for claims 29 and 22-23. The examiner notes as stated above in the rejection, the time of information whether it be data, text, or graphics does not functionally distinguish the instant application from the prior art of record. The steps are performed regardless of the types of information being used. As to applicants amended limitations of "associating" and image this again is the same as associating a delivery status with a mail piece. The term associating is a general term and can be given a very broad interpretation of how an image is being associated with a mail piece. The instant applicant is tracking and tracing a mail piece, a picture verses a text description of the mail piece is not going to change how the mail piece is being track and/or traced.

6. Therefore, the rejection stands as stated above.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
